Among us is a 4-10 game for player entertainment that you can play online. The premise is simple: there are impostors mixed with your spacecraft crew who want to kill everyone and sabotage the mission. Among us up is the thrill of classic party games such as Werewolf Online. It's challenging, pervasive and fun. This free multi-player game combines aspects of teamwork and betrayal. All you need are a few friends, a Discord server or a local WiFi network. People can join from a variety of devices, because the game is independent of the platform. Among us, they will put you in a spaceship, which you should maintain to return to Earth. However, a foreign imposter (or several of them) is also on board, replacing one of your crew members. They should be easy to detect, but there's a catch. You can't communicate with your teammates while playing – just watch their behavior in the game. The role of a cheater is to undermine your activities and kill everyone in the group. They sabotage your progress by scrolling through the hatches, capturing other players unawares, misdirecting murders and mismanaging maintenance tasks. The crew can respond quickly to attacks, monitor other members and locate the alien. Once you're reasonably sure you've discovered them, give voice to get them off the ship. Otherwise, the mechanics of gaming are simple. You can walk, fix boat problems, murders (in some cases) and report the body you found. Where can you run this program? This game works on Android 9.0, iOS 12.1.2 Windows 7 and later versions. Is there a better alternative? I do. Space Station 13 has a similar theme and a little more layers of story. Other, less complex alternatives include Hide Online and Town of Salem.Although the tasks of maintaining ships are somewhat repetitive, among us the first murder continues. It's wonderful to see your friends lying, going backwards and collaborating to find the Imposter. I do. As long as you have a large enough group of friends interested in the story, this game will offer you hours of fun.
